

Chapter 1: Functions

- | | |
|------------|--|
| 1.1 | Functions and their representations |
| 1.2 | Linear functions |
| 1.3 | Polynomial functions |
| 1.4 | Rational and piecewise-defined functions |
| 1.5 | Combining and composing functions |
| 1.6 | Inverse functions |
| 1.7 | Exponential functions |
| 1.8 | Logarithmic functions |
| 1.9 | Trigonometric functions |

Chapter 2: Limits and Continuity

- 2.1** Preview to calculus

- 2.2** Average and instantaneous velocity

- 2.3** Limits of a function

- 2.4** Evaluating limits algebraically

- 2.5** Limits at infinity, infinite limits, and asymptotes

- 2.6** Continuity

Chapter 3: Derivatives

3.1 Derivatives and the tangent problem

3.2 Derivative as a function

3.3 Basic rules of finding derivatives

3.4 Product and quotient rules

3.5 Chain rule

3.6 Derivatives of trigonometric functions

3.7 Implicit differentiation

3.8 Derivatives of exponential functions

3.9 Derivatives of logarithmic functions

Chapter 4: Applications of Derivatives

- | | |
|------------|--|
| 4.1 | Related Rates |
| 4.2 | Linear approximation and differentials |
| 4.3 | Analyzing functions (Global and local extrema) |
| 4.4 | Analyzing functions (Mean Value Theorem) |
| 4.5 | Analyzing functions (First derivative test, increasing and decreasing functions) |
| 4.6 | Analyzing functions (Second derivative test and concavity) |
| 4.7 | Analyzing functions (Sketching curves) |
| 4.8 | Applied optimization |
| 4.9 | Indeterminate forms and L'Hopital's rule |

Chapter 5: Integrals

5.1 Antiderivatives and indefinite integrals

5.2 Antiderivatives of trigonometric, exponential, and reciprocal functions

5.3 Integrals and the area problem

5.4 The definite integral

5.5 The Fundamental Theorem of Calculus

5.6 Net Change Theorem

5.7 Integration by substitution

Chapter 6: Appendix

- | | |
|-------------|--|
| 6.1 | Additional questions: Functions and their representations |
| 6.2 | Additional questions: Linear functions |
| 6.3 | Additional questions: Polynomial functions |
| 6.4 | Additional questions: Rational and piecewise-defined functions |
| 6.5 | Additional questions: Combining and composing functions |
| 6.6 | Additional questions: Inverse functions |
| 6.7 | Additional questions: Exponential functions |
| 6.8 | Additional questions: Logarithmic functions |
| 6.9 | Additional questions: Trigonometric functions |
| 6.10 | Additional questions: Derivatives and the tangent problem |

Chapter 6: Appendix

- | | |
|-------------|--|
| 6.11 | Additional questions: Derivative as a function |
| 6.12 | Additional questions: Basic rules of finding derivatives |
| 6.13 | Additional questions: Product and quotient rules |
| 6.14 | Additional questions: Chain rule |
| 6.15 | Additional questions: Derivatives of trigonometric functions |
| 6.16 | Additional questions: Implicit differentiation |
| 6.17 | Additional questions: Derivatives of exponential functions |
| 6.18 | Additional questions: Derivatives of logarithmic functions |
| 6.19 | Additional questions: Related Rates |
| 6.20 | Additional questions: Linear approximation and differentials |

Chapter 6: Appendix

6.21

Additional questions: Analyzing functions (Global and local extrema)

6.22

Additional questions: Analyzing functions (Mean Value Theorem)

6.23

Additional questions: Analyzing functions (First derivative test, increasing and decreasing functions)

6.24

Additional questions: Analyzing functions (Second derivative test and concavity)

6.25

Additional questions: Analyzing functions (Sketching curves)

6.26

Additional questions: Applied optimization
